Page 0 - Initial entry

Who is the person writing in this journal and do you remember all that is written.

When did I write this? What section were they referring to?

Explain how we got to be working with the kubolds, why are we working for them? What are we getting out of this?

I must have forgotten to enter this... Mupa met us in the city we landed in and pleaded for support from adventurers. Asserted they'd be able to pay us 1000G in jewels as payment. We get to help someone in need?

Are there supernatural forces other than Habakkuk that you are aware of that could cause time based alterations/experiences?

Who is writing these questions? Habakkuk is all I would think of for alterations such as those.

Found camp outside Sheldi. Came on two guards (unknown race, haven't seen before) who heard us coming. A third creature (also unknown race) ran out of the tent and ran away.

New Creature - Large long ears. Brown fur all around with white areas (inner ear, around face, etc.). Looks a lot like a rabbit. This creature is very fast and was nimble enough to be out of sight in just seconds.

After taking out the guards and inspecting the camp, it looks like they were keeping things mobile. But this was clearly a spot used over and over. We then tracked the rabbit-like creature through the woods. It's path is pretty obvious and we think it's just running full out. It's been 3 straight days of trudging through the woods following this creature.
